**STATE SMALL WATER SYSTEM CONNECTION LIST**

Dear System Owner/Operator,

In an effort to improve our records concerning the State Small Water Systems within Tulare County, this form was created in order to identify the connections and populations served by each water system. This form will allow Tulare County Environmental Health to contact all users on a State Small Water System, in the event of a localized emergency or natural disaster situation, with important information pertaining to their drinking water. Please complete the top section of this form for the water system's responsible party, and one line per household in the bottom section, and return to this office at your earliest convenience.
